where shall i contact ,if my device is broken ?

Posting through web application.

The tracker comes with flexible to keep it from slipping of child's.

We can use high sensitivity vibration sensor

How can i receive kid current location ?

Code developed in spontaneous interaction.

Device benifit with durable battery life and good connectivity.

Proposed system component cost calculation is low.

Devices easy to prepare without looking complicated like bands or lockets.

Get the location of the device in longitude and latitude format.

Shortest path can be discovered.

Google map improves the accuracy of the tracking location of the children.

Interact with people

We can use high sensitivity vibration sensor

the tracker in which you can even store the data so that you can see which route your kid has taken in the past days.

CUSTOMER THOUGHT

What is the customer thinking?
■
■
■

where can i buy the product ?

It gives children more freedom because when parents know where the children are?
